

FOR IMMEDIATE RELEASE-Update  
June 28, 2022

Last week, Rainycrest was experiencing issues with the air conditioning unit that cools both the kitchen and main dining hall. We had temporary changes in Resident dining location and seating arrangements and some minor menu changes.

As of Friday, June 24th we are happy to report that temperatures were stabilized with the newly installed interim air conditioning unit and residents have returned to the main dining hall for meals.

Thank you to the maintenance team and contractors for your quick work in resolving the situation, to staff in all departments for ensuring Residents quality of care was maintained throughout this disruption and to the Residents and families for your patience and understanding.
